

# Unsurpassed Future-Ready Performance

Discover how open interoperability empowers you to meet the security challenges of today and tomorrow

## Unparalleled Cybersecurity

### Proactive Vulnerability Scanning

Kernel and firmware regularly analyzed for common vulnerabilities and exposures (CVEs)

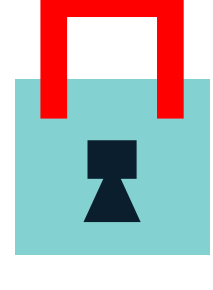

### Compliance-Ready Technology

Threat modeling, controls and functionality designed to meet regulatory requirements

### Secure Software Development Lifecycle

Continuous testing and rigorous best practices

### Trusted From the Start

Secure boot authenticates firmware at startup and ARM® TrustZone® architecture isolates hardware and software resources

## Reliability and Continuity

**Backward Compatible:** Easier integration with existing investments

**Increased Availability:** Reduced risk of supply chain disruption

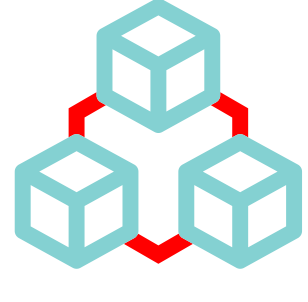

**Simpler Management:** Centralized updates and configuration

**Long Lifecycle:** Mercury is committed to long-term hardware support

**In-House Technology:** A dedicated development team ensures high quality and customer focus

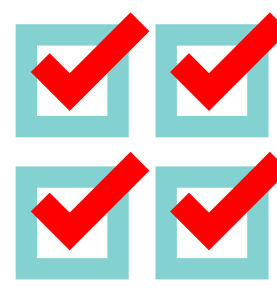

**Unified platform:** Single, advanced OS across MP and LP hardware for streamlined updates

## Future-Ready

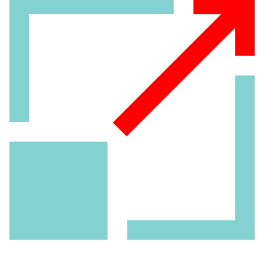

### Industry-leading Open Architecture

Choose best-of-breed solutions from leading access control system providers

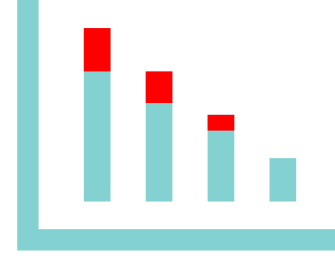

### Equipped for Innovation

Capable hardware is ready to support the edge-based processing and analytics of tomorrow

### Continuous Integration at Scale

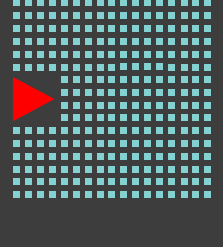

Update capabilities rapidly across your ecosystem

### Reduce Integration Cost

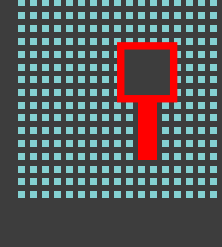

Integrate new peripherals and features with less time and effort

## Built with End-to-End Security Design Best Practices

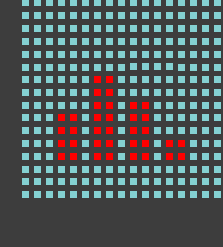

### SAST

Static analysis security testing

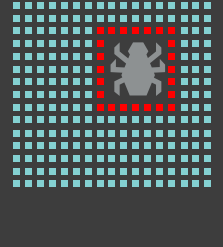

### SCA

Software composition analysis

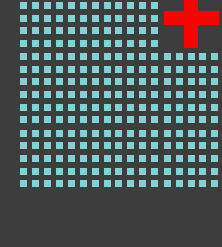

### DAST

Vulnerability scanning and dynamic analysis security testing

### PSIR

Product security incident response

### Third-party testing and auditing

## A Proven Industry Leader

**30+**

OEMs support Mercury

**25+**

years of controller development and innovation

**5M+**

controllers installed worldwide

**30+**

countries with HID presence

## Accelerate Your Intelligent Security Edge

Discover the all-new Mercury MP Controllers
